

Specialized design. Enhanced materials.

Choosing the right components for your parlor is important to optimize your dairy's performance. Lauren AgriSystems' air tubing is designed for flexibility and durability to guard against hardening, swelling and distortion under various environmental conditions. The key to the performance of LaurenAg's air tubing stems from the high grade polymer blend used in its construction.

High Grade Polymer Blend

- No leaching
- Bisphenol A (BPA) and Phthalate-free
- Non-toxic
- Maintains performance in extreme temperatures
- Medical grade material with superior resistance to high fat emulsions
- Complete material traceability

Durable

Long-lasting and superior resistance to chemicals and biological materials.

Flexible

Remains pliable during hot and cold temperature extremes, maintaining a consistent feel and performance in typical parlor conditions.

Short Air Tubes; #10501

Custom sizing

Short air tubes and twin tube available in custom and standard lengths.

Air Tubing Features

Lauren AgriSystems' air tubing is manufactured from a high grade vinyl blend that is phthalate-free and non-toxic. This advanced polymer is specifically designed for the extrusion process, creating tubing that maintains constant vacuum for stable pulsation and less maintenance in the parlor.

Medical grade base: Family of vinyl compounds used to create air tubing were developed for medical applications requiring non-phthalate plasticizers.

Pliability: Fillers are carefully measured and added at specific levels to increase wall strength while not compromising flexibility across temperature ranges.

Traceability: All raw materials are tracked from original lot number to final product, ensuring fully transparent manufacturing processes for ultimate quality control.

Twin Air Tube; #10503

Our air tubing is available in two configurations:

- Short air tube (with or without green stripe) in 9/32" inside diameter; variety of lengths.
- Twin tube in 9/32" inside diameter; variety of lengths.

Ordering Specifications

Part # (Clear)	Part # (Clear w/ green stripe)	Description	Quantity (per box)
10515	10515G	Short Air Tubes - 6.5" cut	100 ft.
10514	10514G	Short Air Tubes - 7" cut	100 ft.
10513	10513G	Short Air Tubes - 7.5" cut	100 ft.
10502	10502G	Short Air Tubes - 8" cut	100 ft.
10501	10501G	Short Air Tubes - 8.5" cut	Any
10512	10512G	Short Air Tubes - 9" cut	100 ft.
10503	-	Twin Air Tube	200 ft.

What others are saying...

Switching to Lauren liners is one of the best changes I ever made. Squawks are almost a thing of the past and teats no longer turn red, even on manual.
