Parlor Product Guide

Lauren Liners • Access Liners • Hose & Accessories

Expanded offerings from the original liner industry innovators.

When it comes to dairy solutions, Lauren AgriSystems remains dedicated to working hard—**for Herd, for Profit, for Dairy**—to become the parlor's most vital partner.

Our entire team is focused on delivering the premium products herds deserve—with options to help optimize your operation—at prices and a lower cost per milking that allow your business to thrive. Our expanded dealer network enables us to supply the parlor with our outstanding products, like our patented Lauren Liners, Access Liners and premium milk hose.

All of our new and traditional offerings are made from the same superior materials, using our proven manufacturing methods, to create the reliable, high-quality products you've trusted for years. We are dedicated to protecting the dairy's cows, legacy and way of life in ways that don't compromise the profitability of your business.

Read through this brochure for more information on our most popular products. Visit our website or contact your local dealer for more details or to begin the ordering process.

We look forward to serving you!

Together

**we can strengthen your business,
improve your cows' health and happiness
and make the industry better while we're at it.**

**Herd Health. Parlor Productivity.
Industry Advancement.**

The Lauren Liner Makes the Difference.

Fast Milking

The Lauren Liner is designed to provide fast, complete milking for increased productivity.

Fewer Squawks

Using Lauren Liners results in fewer squawks. Parlor managers can also expect fewer fall-offs and kickoffs.

Optimal Liner Life

Our liners are made of a proprietary DairyGrade® silicone compound that is guaranteed for a minimum of 4,000 milkings.

Guaranteed Teat-End Health

Research proves that using the Tri-Circle® barrel improves teat ends.

Greater Cleanability

The liner meets 3-A testing standards, resists fatigue-induced cracking and maintains a smooth surface finish to prevent unwanted residue and bacteria buildup.

Quality Control

Every liner sold is individually inspected, preconditioned and engraved with a unique serial number, providing complete product traceability from raw material to end user.

Optional Vents

Our patented vent design—now with standard and reduced-airflow vent options—minimizes clogging and ensures uniform milk flow.

With a Tri-Fecta offering, Lauren Liners are now available in three styles for optimal fit and performance. Available in standard vented, reduced-airflow vented and nonvented liners, with or without silicone-reinforced short milk tubes.

Options for Your Operation

- Choose either version of our standard vented liners if your system has no vacuum limitations, does not have venting in the claw or if you prefer multiple vents in the cluster. These liners feature the standard yellow vent.
- Our NEW Reduced-Airflow Vented Liners are designed for systems with vacuum limitations, with venting in the claw or if you prefer multiple vents in the cluster.
- Our nonvented liners work well with systems with vacuum limitations and vented claws.
- Our silicone-reinforced liners are a good choice if your dairy experiences frequent short milk tube tears.

Part #	Description	Qty/Box
Lauren Liner/Original Green		
10104	Standard Vent, Standard Liner	100 liners
10106	Standard Vent, Reinforced Liner	100 liners
NEW! Lauren Liner/Light Green		
10109	Reduced-Airflow Vent, Standard Liner	100 liners
10110	Reduced-Airflow Vent, Reinforced Liner	100 liners
Lauren Liner/Dark Green		
10124	Nonvented, Standard Liner	100 liners
10126	Nonvented, Reinforced Liner	100 liners

Improve your bottom line, reduce expenses and increase efficiency.

More Comfort. More Productivity. More Profit.

Value Adds Up With the Access Black Liner.

The perfect mix of value, exclusive vent technology and long-lasting performance is now available. Protect your herd and your business's bottom line.

Better Teat-End Health

The Access liner's triangle barrel and silicone-blended material deliver excellent teat-end health results without compromising milking speed.

Exclusive DairyGrade® Material

Our proprietary compound resists fatigue-induced cracking and makes the liner easier to clean by maintaining a smooth surface finish that prevents unwanted residue and bacteria buildup.

Quality Control

Every Access liner is individually inspected and engraved with a unique serial number, providing complete product traceability from raw material to end user.

Quality Control

Every Access liner is individually inspected and engraved with a unique serial number, providing complete product traceability from raw material to end user.

Longevity

Made with durable DairyGrade® material that's rated to a minimum of 3,000 milkings, Access reduces the number of time-consuming system switchouts.

Versatility

The Access liner is designed to work on a variety of milking systems and configurations; it's available with the patented directional vent and in a nonvented version.

Vent Technology

Available only on Lauren black liners, the Directional Flow Vent Technology works with the flow of the milk, providing seamless ventilation that prevents disruptions within the liner. The result is a fast, consistent flow for maximum output.

Part #	Description	Qty/Box
10111	Access Liner, Directional Vent Technology	100 liners
10121	Access Liner, Nonvented	100 liners
10153	Access Liner Shell	50 pieces
10177	Directional Vent	50 pieces

Lauren Access Black Triangle Liners do what other black liners can't, all while working within your budget.

Milking Products

Pulsation Enhancers

Designed to adjust the C-phase of the pulsator, our enhancers slow down the C-phase, allowing the liner to close slower and softer, eliminating the slapping effect while increasing cow comfort.

Part #	Description	Qty/Box
10507	CR 30, Green	50 pieces
10508	CR 45, Yellow	50 pieces
10509	CR 60, Burgundy	50 pieces

Short Air Tubes

Durable and long-lasting, our short air tubes are made from a high-grade polymer blend to stay flexible and maintain performance during cold or hot temperature extremes.

Part #	Part #	Description	Qty/Box
10501	10501G	SAT 8.5" length, 9/32" ID	100 pieces
10512	—	SAT 9" length, 9/32" ID	100 pieces
10513	—	SAT 7.5" length, 9/32" ID	100 pieces
10514	—	SAT 7" length, 9/32" ID	100 pieces
10515	—	SAT 6.5" length, 9/32" ID	100 pieces

Twin Tube

Durable and long-lasting, our twin tube is made from a high-grade polymer blend to stay flexible and maintain performance during cold or hot temperature extremes.

Part #	Description	Qty/Box
10503	Twin Tube, 9/32" ID	200'
10504	Single Tube, 9/32" ID	200'
10505	Twin Tube, 3/8" ID	100'

Premium Milk Hose

Designed for superior durability, flexibility and cleanability, our premium milk hose is constructed from our DairyGrade® silicone compound, a food-grade silicone blend that meets 3-A testing standards. Available in two shapes: round and Tri-Circle®. The Tri-Circle shape has kink-resistant ribs, which make it ideal for tight-radiused applications.

Part #	Description	Qty/Box
10202	Milk Hose, 5/8" ID, Round	100'
10302	Milk Hose, 5/8" ID, Tri-Circle	100'
10201	Milk Hose, 3/4" ID, Round	100'
10301	Milk Hose, 3/4" ID, Tri-Circle	100'
10200	Milk Hose, 7/8" ID, Round	50'

Clear Milk Hose

Made with our DairyGrade® silicone compound, our clear milk hose delivers both visibility and high performance.

Part #	Description	Qty/Box
10212	Clear Milk Hose, 5/8" ID, Round	100'
10211	Clear Milk Hose, 3/4" ID, Round	100'
10210	Clear Milk Hose, 7/8" ID, Round	50'

Lauren Milking Shells

Specifically designed to integrate with Lauren Liners, our shells incorporate an antitwist feature to ensure proper alignment. Available in a weighted and nonweighted version.

Part #	Description	Qty/Box
10152	Milking Shells, Weighted	50 pieces
10152N	Milking Shells, Nonweighted	50 pieces

Other Products

Choose the right components to optimize your parlor's performance.

Wash Cups

Made using the same DairyGrade® silicone compound as our Lauren Liner, these replace the conventional black rubber cups on today's most commonly used wash trays. Also available with an adapter for bolting onto trays.

Part #	Description	Qty/Box
10161	Wash Cups	100 pieces
10165	Wash Cups with Adapter	75 pieces

CIP Inserts

Convert a 57mm wash tray to a 51mm wash tray to accommodate the Lauren Liners.

Part #	Description	Qty/Box
10160	CIP Inserts	100 pieces

Jetter Cups

Provide optimal fit and seal for enhanced system cleaning. Works with most 51mm liners.

Part #	Description	Qty/Box
10162	Jetter Cups	100 pieces

The Science Behind the Solutions

All Lauren AgriSystems' products are designed to make your job easier and your business more profitable. We partner with materials experts, top laboratories and industry professionals to bring you high-performance products and true peace of mind.

Lauren Liners, Lauren Milking Shells and Premium Milk Hose

Their patented Tri-Circle® barrel and proprietary DairyGrade® silicone blend make them a unique solution.

Tri-Circle® Barrel Design

Under vacuum, the liner collapses evenly along the length of the teat, ensuring undue pressure is not placed on the teat end, which helps make your cows more comfortable.

DairyGrade® Compound

Engineered to specifically match the performance of the Tri-Circle barrel and meet the demands of the milk parlor by lasting a guaranteed 4,000 milkings.

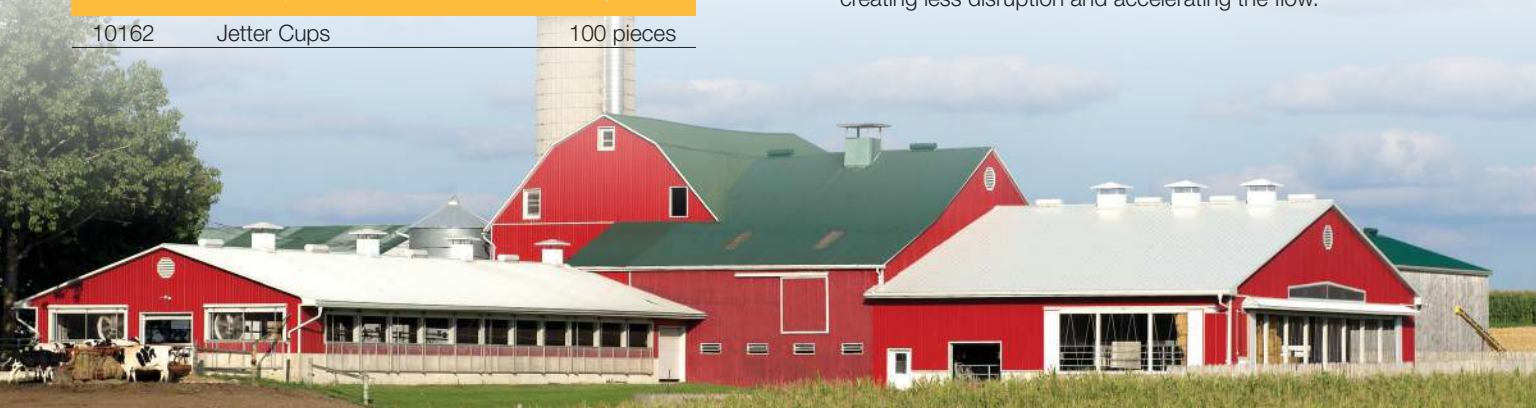

The exclusive silicone blend ensures our products are long-lasting, easy to clean and flexible—even in temperature extremes.

- Meets FDA CFR21 177.2600 standards
- Meets 3-A testing standards
- Bisphenol A (BPA) and phthalate free
- Nonhalogenated
- Ultralow carbon content
- Reduces liner waste

Directional Flow Vent Technology

Exclusive technology that allows air to move with the milk during the milking process, creating less disruption and accelerating the flow.
